

Leeds Planning Ahead Report (End of Life)

Leeds Health & Care Partnership

2022/23 Report (Q1) - Leeds Citywide

Data Source : SystmOne and EMIS

Data Provided by : Leeds Community Healthcare, St Gemma's Hospice, Sue Ryder Wheatfields Hospice and Public Health Leeds (Integrated Digital Services)

Report Compiled by : Business Intelligence Team, Leeds Office of the ICB

	Page
Summary	3
Part 1 - GP Practice EoL Data	
C1.1a Patients who died and were included on EPaCCS in Leeds, breakdown by PCN (Part 1 of 2)	4
C1.1b Patients who died and were included on EPaCCS in Leeds, breakdown by PCN (Part 2 of 2)	5
C1.2a Percentage of Patients on EPaCCS who have achieved Preferred Place of Death in Leeds, breakdown by PCN (Part 1 of 2)	6
C1.2b Percentage of Patients on EPaCCS who have achieved Preferred Place of Death in Leeds, breakdown by PCN (Part 2 of 2)	7
Part 2 - Leeds City EoL Data	
C2.1 Total patient deaths in and out of hospital and total deaths by	8
C2.2 Patients who died and were included on EPaCCS	8
C2.3 Preferred place of death recorded	9
C2.4 Actual place of death recorded	9
C2.5 Preferred Place of Death Achieved (First Choice) by patients	10
C2.6 Duration of time (in weeks) the patients were on EPaCCS (Leeds)	11
C2.7 Deceased EPaCCS patients who have ReSPECT (Recommended Summary Plan for Emergency Care and Treatment) Code recorded on the system.	12
C2.8 Percentage of patients with 3 or more Unplanned Admissions (Non-Elective Inpatient) in the last 90 days of their life.	12

Leeds Planning Ahead Report (End of Life)

The Electronic Palliative Care Coordination System (EPaCCS) is an electronic record that supports advance care planning conversations and improves the coordination of care for people approaching the end of life.

It provides a summary of key recommendations, preferences and information essential to the high quality care for patients with palliative care needs and those choosing to plan ahead, irrespective of prognosis. Local and national data shows that when patients are given the opportunity to discuss and share their preferences they are more likely to achieve their end of life care goals.

This is a 2022-23 (Q1) Leeds Planning Ahead Report report, combining SystemOne and EMIS data for patients registered from all the practices across Leeds.

To ensure a comprehensive view of advance care planning it collates EPaCCS data entered by all relevant care providers: Leeds Community Healthcare community services, hospice services, community palliative care teams in addition to primary care.

These Leeds Planning Ahead Report (End of Life) reports have been produced to enable you to reflect on end of life care in your practice.

Key findings of the 2022/23 Report (Q1) report are:

- ◆ **46% (in Q1)** of adults who died in Leeds had an EPaCCS record which is at par with previous year.
(EPaCCS Deaths / All Deaths) 2022/23: Q1 (703/1537)
(EPaCCS Deaths / All Deaths) 2021/22: Q1 (685/1431) , Q2 (726/1654) , Q3 (833/1842) and Q4 (736/1566)
- ◆ **78%** achieved their preferred place of death in current reporting period compared to 79% for the previous year; with 71% dying outside of hospital compared to 70% in the previous year.
- ◆ The proportion of patients whose EPaCCS record was started more than 3 month before they died is at 55% in current reporting period compared to 50% the previous year.
- ◆ The proportion of patients without an actual place of death recorded has slightly decreased to 13% from 14% last year.
- ◆ Percentage of patients who died and had a RESPECT Code recorded on the system:
2022/23: Q1 (76%)
2021/22: Q1 (48%), Q2 (59%), Q3 (65%) and Q4 (69%)
- ◆ Deaths at home recorded in the current reporting period :
2022/23: Q1 249 deaths (35%)
2021/22: Q1 263 deaths (38%), Q2 261 deaths (36%), Q3 282 deaths (34%) and Q4 267 deaths (36%)

This report covers a period of unprecedented demand across the health and social care environment: particularly given the impact of **COVID-19** on the system. It is a considerable achievement the proportion of patients being supported in their preferred place has been maintained along with the overall proportion of people with an EPaCCS record. This marks a sustained improvement on 2016-2017 when 33% of adults who died had an EPaCCS record.

The findings show that that a greater proportion of people are being given opportunities to discuss , document and share their care preferences at an earlier stage and demonstrate improved data quality.

Part 1 - GP Practice EPaCCS Data 2022/23 Report (Q1)

Leeds Health & Care Partnership

C1.1a Patients who died and were included on EPaCCS in Leeds, breakdown by PCN (Part 1 of 2)

a. Number of All patient deaths

Q1	Q2	Q3	Q4	Total
1537				1537

b. Number of patients deaths on EPaCCS

703				703
-----	--	--	--	-----

c. % of patient deaths on EPaCCS

46%				46%
-----	--	--	--	-----

Percentage of patients who died on EPaCCS by PCN
