Summary	3
Part 1 - GP Practice EPaCCS Data	
C1.1a Patients who died and were included on EPaCCS - NHS Leeds CCG, breakdown by PCN (Part 1 of 2)	4
C1.1b Patients who died and were included on EPaCCS - NHS Leeds CCG, breakdown by PCN (Part 2 of 2)	5
C1.2a Percentage of Patients on EPaCCS who have achieved Preferred Place of Death - NHS Leeds CCG, breakdown by PCN (Part 1 of 2)	6
C1.2b Percentage of Patients on EPaCCS who have achieved Preferred Place of Death - NHS Leeds CCG, breakdown by PCN (Part 2 of 2)	7
Part 2 - Leeds CCGs EPaCCS Data	
C2.1 Total patient deaths in and out of hospital and total deaths by CCG	8
C2.2 Patients who died and were included on EPaCCS	8
C2.3 Preferred place of death recorded by CCG	9
C2.4 Actual place of death recorded by CCG	9
C2.5 Preferred Place of Death Achieved (First Choice) by Leeds CCG EPaCCS patients	10
C2.6 Duration of time (in weeks) the patients were on EPaCCS (Leeds City wide)	11
C2.7 Deceased EPaCCS patients who have ReSPECT (Recommended Summary Plan for Emergency Care and Treatment) Code recorded on the system.	12
C2.8 Percentage of patients with 3 or more Unplanned Admissions (Non-Elective Inpatient) in the last 90 days of their life.	12

EPaCCS Outcome Report

The Electronic Palliative Care Coordination System (EPaCCS) is an electronic record that supports advance care planning conversations and improves the coordination of care for people approaching the end of life.

It provides a summary of key recommendations, preferences and information essential to the high quality care for patients with palliative care needs and those choosing to plan ahead, irrespective of prognosis. Local and national data shows that when patients are given the opportunity to discuss and share their preferences they are more likely to achieve their end of life care goals.

This is a 2021-22 (Q2) Leeds EPaCCS report, combining SystmOne and EMIS data for patients registered from all the practices across Leeds.

To ensure a comprehensive view of advance care planning it collates EPaCCS data entered by all relevant care providers: Leeds Community Healthcare community services, hospice services, community palliative care teams in addition to primary care.

These EPaCCS reports have been produced to enable you to reflect on end of life care in your practice.

Key findings of the 2021/22 Report (Q2) report are:

- ◆ **44% (in Q2)** of adults who died in Leeds had an EPaCCS record compared to 48% in previous year.
(EPaCCS Deaths / All Deaths) 2021/22: Q1 (679/1415) , Q2 (720/1627)
(EPaCCS Deaths / All Deaths) 2020/21: Q1 (1074/2072), Q2 (675/1308) , Q3 (850/1917) and Q4 (802/1811)
- ◆ **79%** achieved their preferred place of death in current reporting period compared to 80% for the previous year; with 66% dying outside of hospital compared to 71% in the previous year.
- ◆ The proportion of patients whose EPaCCS record was started more than 3 month before they died is at 53% in current reporting period compared to 54% the previous year.
- ◆ The proportion of patients without an actual place of death recorded has slightly increased to 19% from 13% last year.
- ◆ Percentage of patients who died and had a RESPECT Code recorded on the system:
2021/22: Q1 (48%), Q2 (59%)
2020/21: Q1 (10%), Q2 (19%), Q3 (17%) and Q4 (31%)
- ◆ Deaths at home has significantly increased in the current reporting period
2021/22: Q1 258 deaths (38%), Q2 250 deaths (35%)
2020/21: Q1 306 deaths (28%), Q2 233 deaths (35%), Q3 281 deaths (33%) and Q4 274 (34%)

This report covers a period of unprecedented demand across the health and social care environment: particularly given the impact of **COVID-19** on the system. It is a considerable achievement the proportion of patients being supported in their preferred place has been maintained along with the overall proportion of people with an EPaCCS record. This marks a sustained improvement on 2016-2017 when 33% of adults who died had an EPaCCS record.

The findings show that that a greater proportion of people are being given opportunities to discuss , document and share their care preferences at an earlier stage and demonstrate improved data quality.

Part 1 - GP Practice EPaCCS Data 2021/22 Report (Q2)

NHS Leeds CCG

C1.1a Patients who died and were included on EPaCCS - NHS Leeds CCG, breakdown by PCN (Part 1 of 2)

	Q1	Q2	Q3	Q4	Total
a. Number of All patient deaths?	1415	1627			3042
